

PART 4:

Data profiles for Local Government Areas in metropolitan regions (on CD)

The data profiles for Part 4 are available on compact disc from the Aged Care Branch of the Department of Human Services.

The Local Government Area Profiles set out three tables for each LGA:

Table 1: Languages spoken and English proficiency, by age (LGA)

Table 2: Languages other than English spoken at home, and proficiency in English, for age groups 45-64 and 65+ (LGA)

Table 3: Top 20 languages spoken in (LGA), by numbers, % of all speakers of languages other than English, and proficiency in English.

When accessing these profiles, the notes to the tables need to be read carefully to understand the exclusions that account for minor variations between the totals in the three tables for each LGA.
