Introduction

This section lists all VINAH edits. It indicates the message that will be returned for each edit.

Edit reports will indicate individual messages with rejection edits and messages that have been rejected because they were transmitted in a batch that was rejected. See Section 7 for samples of the edit report files returned.

About the Editing Process

VINAH Edits are applied in groups in the order listed below:

1. Process Validations (File)
2. File Level Validations (File)
3. Batch Level Validations (Batch)
4. HL7 Validations (Batch)
5. Data Validations (Batch)

A failure of a file or batch at any stage will prevent further validation levels running for that file or batch, as appropriate.

Data Validations are further subdivided into logical groupings within this document. However failure of a validation in one of these sub-groups does not prevent other validations at the Data Validation level from running.

Changes for this edition

Edits have been logically ordered and renumbered from previous VINAH versions.

Pre-Data Validations

Process Validations

(File)

(Validation ID = Snnn)

Action: File Fail

Validation ID	Message	Cause	Resolution
S000	Unspecified system error while handling file <FileName>	An error occurred in the VINAH processing system, the nature of which is unknown.	Contact the HDSS Helpdesk for support.
S001	Submission file <FileName> is corrupt	The file was unable to be processed, most likely due to a problem with the format or contents of the submission.	If possible, re-extract the submission file and retry the submission (with a new filename). If the problem recurs contact the HDSS Helpdesk for support.
S002	Submission file <FileName> was processed successfully, but an internal VINAH process failed	The file was successfully processed, but an error occurred in a step of the VINAH processing system.	Contact the HDSS Helpdesk to address the problem and reprocess the file.

File Level Validations (File) (Validation ID = Fnnn)

Action: File Fail

Validation ID	Message	Cause	Resolution
F001	Filename <FileName> is not valid	The file name provided does not meet the specified naming convention.	Rename the file to meet the naming convention and resubmit.
F002	A file named '<FileName>' has previously been submitted	The file being transmitted has previously been received. Each submission file should be named uniquely, regardless of if its contents were previously not accepted.	Rename the file to meet the naming convention and resubmit.
F003	File <FileName> is empty	The file that has been transmitted is empty/contains no data.	Re-extract the submission file from your system. If the problem recurs contact the HDSS Helpdesk for support.
F004	Conversion from HL7 to XML failed in file <FileName>. Parser Output as follows: <ErrorText>	A VINAH process which translates HL7 into XML failed. The cause of the failure is output in the message text.	Contact the HDSS Helpdesk or your software vendor for support.

Batch Level Validations (Batch) (Validation ID = Bnnn)

Action: File Fail

Validation ID	Message	Cause	Resolution
B003	Batch Header identical to previously submitted Batch Header (<Batch Control ID>)	The same batch header (BHS) segment has previously been transmitted. This rule aims to prevent the same data being submitted twice.	Re-extract the submission file from your system. If the problem recurs contact the HDSS Helpdesk for support.
B004	Supplied Batch Control ID has been used previously (<Batch Control ID>)	The Batch Control ID being transmitted has previously been received. Each Batch Control ID should be unique, regardless of if it's contents were previously not accepted.	Contact the HDSS Helpdesk or your software vendor for support.
B005	Batch Header is Corrupt (<Batch No>)	There was a problem translating the HL7 in the batch header. The Batch is the nth in the file.	Contact the HDSS Helpdesk or your software vendor for support.

HL7 Validations (Batch) (Validation ID = HL7nnn)

Action: File Fail

Validation ID	Message	Cause	Resolution
HL7001	File must contain exactly 1 FHS segment, file contains <n> FHS Segments	File does not meet HL7 and VINAH specifications.	Contact the HDSS Helpdesk or your software vendor for support.
HL7002	File must contain exactly 1 FTS segment, file contains <n> FTS Segments	File does not meet HL7 and VINAH specifications.	Contact the HDSS Helpdesk or your software vendor for support.
HL7003	First line in File must be an FHS segment <FirstLine>	File does not meet HL7 and VINAH specifications.	Contact the HDSS Helpdesk or your software vendor for support.
HL7004	File must contain at least 1 BHS segment, file contains 0 BHS Segments	File does not meet HL7 and VINAH specifications.	Contact the HDSS Helpdesk or your software vendor for support.
HL7005	File must contain at least 1 BTS segment, file contains 0 BTS Segments	File does not meet HL7 and VINAH specifications.	Contact the HDSS Helpdesk or your software vendor for support.
HL7006	File must have equal number of BHS/BTS segments. File contains <n1> BHS Segments and <n2> BTS Segments	File does not meet HL7 and VINAH specifications.	Contact the HDSS Helpdesk or your software vendor for support.
HL7007	No of MSH segments must be >= No of BHS Segments. File has <n1> MSH Segments and <n2> BHS Segments	File does not meet HL7 and VINAH specifications.	Contact the HDSS Helpdesk or your software vendor for support.
HL7008	Conversion from HL7 to XML failed in file <FileName>. Parser Output as follows: <ErrorText>	A VINAH process which translates HL7 into XML failed. The cause of the failure is output in the message text.	Contact the HDSS Helpdesk or your software vendor for support.
HL7009	Message does not conform to HL7 Schema <SchemaName>. Error text as follows: <ErrorText>	The HL7 message does not validate against a relevant VINAH HL7 message schema.	Contact the HDSS Helpdesk or your software vendor for support.

Data Validations (Batch) (Validation ID = Ennn)

Generic Validation Rules

Action: Batch Fail

Validation ID	Message	Cause	Resolution
E001	The field '<FieldName>' (<HL7 Field>) is mandatory, but no value was supplied	A field that is required to have a value was empty. Consult with Section 3 of this manual to determine if a field needs to be populated.	Ensure there is a valid value in the relevant field in your system for the record. If the value seems correct, or you do not have access to the code list, contact your software vendor for support.
E002	The field '<FieldName>' (<HL7 Field>) is mandatory for this Program/Stream <Program/Stream>, but no value was supplied	A field that is required to have a value in this Program/Stream was empty. Consult with Section 3 of this manual to determine if a field needs to be populated.	Ensure there is a valid value in the relevant field in your system for the record. If the value seems correct, or you do not have access to the code list, contact your software vendor for support.
E003	The field '<FieldName>' (<HL7 Field>) cannot have a value in this Program/Stream <Program/Stream>	A field that is not relevant to Program/Stream has a value. Consult with Section 3 of this manual to determine if a field needs to be populated.	Ensure there is a valid value in the relevant field in your system for the record. If the value seems correct, or you do not have access to the code list, contact your software vendor for support.
E004	Invalid Code Supplied ('<CodeSupplied>') for field '<FieldName>' (<HL7 Field>). Value must exist in code table <CodeTable>	A value that was supplied in the field does not exist in the relevant code table. Consult with Section 3 of this manual to determine the correct value with which to populate the field.	Ensure there is a valid value in the relevant field in your system for the record. If the value seems correct, or you do not have access to the code list, contact your software vendor for support.
E005	Invalid Code Supplied ('<CodeSupplied>') for field '<FieldName>' (<HL7 Field>). Value must exist in code table <CodeTable> and be valid for this Program/Stream <ProgramStream>	A value that was supplied in the field exists in the code table, but is not valid for this Program/Stream. Consult with Section 3 of this manual to determine the correct value with which to populate the field.	Ensure there is a valid value in the relevant field in your system for the record. If the value seems correct, or you do not have access to the code list, contact your software vendor for support.
E006	Invalid Data Type in value '<ValueSupplied>' for field '<FieldName>' (<HL7 Field>). Value must be of a <DataType> datatype	The value supplied for the field must represent a certain data type. Consult with Section 3 of this manual to determine the correct format of the data for this field.	Ensure the value in the relevant field is of the correct data type in your system for the record. If the value seems correct, or you do not have access to the formatting, contact your software vendor for support.

Patient/Client Registration Integrity Rules

Action: Batch Fail

Validation ID	Message	Cause	Resolution
E101	The patient/client being registered has previously been registered (<OrganisationIdentifier>), <PersonIdentifier>	An ADT_A04 HL7 message was sent to register a patient/client. The patient/client has previously been registered with VINAH.	Check that the period for which you are extracting data has not been previously transmitted. Contact the HDSS Helpdesk or your software vendor for support.
E102	A message was sent to update an existing patient's/client's information, but has not previously been registered (<OrganisationIdentifier>), <PersonIdentifier>	An ADT_A08 HL7 message was sent to update information relating to an existing patient/client. The person identifier referred to has not been previously registered via an ADT_A04 message, so the update cannot occur.	Contact the HDSS Helpdesk or your software vendor for support

Patient/Client Registration Validation Rules

Action: Batch Fail

Validation ID	Message	Cause	Resolution
E151	Client Age <n> is greater than 120 years.	It is most likely that an error was made during the data entry for this patient's/client's date of birth	Check that the date of birth for the patient/client is correct, and resubmit the record
E152	Carer Availability is 'Has a carer' but Carer Residency Status was not supplied.		Check that the value of the corresponding data elements are correct, and resubmit the record
E153	Invalid combination of Postcode (<value>) and Locality (<value>)	The postcode and locality values must be a valid combination	Check that the value of the corresponding data elements are correct, and resubmit the record. Please note this error may be triggered when either field is missing or invalid on their own.
E154	Where a Date of Death is reported, a Date of Death Accuracy Code and Place of Death must be provided	Where a Date of Death is reported, a Date of Death Accuracy Code and Place of Death must be provided	Check that the value of the corresponding data elements are correct, and resubmit the record. Please note this error may be triggered when any field is missing or invalid on its own.

Episode Integrity Rules

Action: Batch Fail

Validation ID	Message	Cause	Resolution
E201	Open episode message was sent for an episode that already exists in the system (<OrganisationIdentifier>), <EpisodeIdentifier>	A PPP_PCB HL7 message was sent to open an episode. An episode with the same identifier has previously been registered with VINAH.	<p>1) If you are unsure why this error is occurring, confirm you are extracting the correct period of data, and if the previous submission was accepted.</p> <p>2) Contact the HDSS Helpdesk or your software vendor for support.</p>
E202	Episode update/delete message was sent, but the episode being referred to has not been previously registered (<OrganisationIdentifier>, <EpisodeIdentifier>)	A PPP_PCC or PPP_PCD HL7 message was sent to update/delete an episode, but the episode has not previously been registered with VINAH	<p>1) If you are unsure why this error is occurring, confirm you are extracting the correct period of data, and if the previous submission was accepted.</p> <p>2) Contact the HDSS Helpdesk or your software vendor for support.</p>
E203	Episode message contains a person identifier that has not yet been registered (<OrganisationIdentifier>), <PersonIdentifier>	A PPP HL7 message was sent to open an episode. The patient/client that is referred to on the episode has not previously been registered with VINAH. An ADT_A04 message should first register the patient/client in order for the episode to relate to that patient/client.	<p>1) The registration message for the related patient/client has generated an error, and was not accepted. This message refers to that patient/client, which due to the rejection, is not yet in the database. In this case, it is likely this message can be resent without change once the patient/client registration has been corrected.</p> <p>2) The patient/client registration did not generate an error, but was contained within a batch of messages that were not accepted due to a batch rejection.</p> <p>3) If you are unsure why this error is occurring, confirm you are extracting the correct period of data, and that the previous submission was accepted.</p> <p>4) Contact the HDSS Helpdesk or your software vendor for support.</p>

Validation ID	Message	Cause	Resolution
E204	Open episode message was sent, but the patient/client already has an open episode in the system for the same program/stream (<OrganisationIdentifier>, <PersonIdentifier>, <Program/Stream>)	A PPP_PCB HL7 message was sent to open an episode. A different episode has previously been registered with VINAH for the same patient/client and program/stream.	<p>1) If you are unsure why this error is occurring, confirm you are extracting the correct period of data, and if the previous submission was accepted.</p> <p>2) Contact the HDSS Helpdesk or your software vendor for support.</p>
E205	Episode message contains a referral identifier that has not yet been registered (<OrganisationIdentifier>, <ReferralIdentifier>)	A PPP HL7 message was sent to open an episode. The referral that led to the episode has not previously been registered with VINAH. An RRI_I12 message should first create the referral.	<p>1) The registration message for the related referral has generated an error, and was not accepted. This message refers to that referral, which due to the rejection, is not yet in the database. In this case, it is likely this message can be resent without change once the referral creation has occurred.</p> <p>2) The referral creation did not generate an error, but was contained within a batch of messages that were not accepted due to a batch rejection.</p> <p>3) If you are unsure why this error is occurring, confirm you are extracting the correct period of data, and that the previous submission was accepted.</p> <p>4) Contact the HDSS Helpdesk or your software vendor for support.</p>
E206	Open episode message was sent, but the referral that led to the episode already has an incompatible value in Referral Outcome - <Referral Outcome> (<OrganisationIdentifier>, <ReferralIdentifier>)	A PPP HL7 message was sent to open an episode. The referral that led to the episode either has no value in Referral Identifier, or a value that indicates the referral was not accepted.	Check that the value of the corresponding data elements are correct, and resubmit the record.

Episode Validation Rules

Action: Batch Fail

Validation ID	Message	Cause	Resolution
E251	Episode Start Date <date> is before Date of Birth <date>	Episode Start date must be after the date of birth.	Check that the value of the corresponding data elements are correct, and resubmit the record.
E252	Episode End Date <date> is before Episode Start Date <date>	Episode End Date must be after the Episode Start Date.	Check that the value of the corresponding data elements are correct, and resubmit the record.
E253	Episode must have a Completion of Proposed Plan of Treatment only if it has an Episode End Date	Episode must have a Completion of Proposed Plan of Treatment only if it has an Episode End Date when associated with the HARP-CDM, PAC or SACS programs.	Check that the value of the corresponding data elements are correct, and resubmit the record.
E254	Patient/client must have a Main Carer's Relationship to the Patient when Carer Availability is '1 - Has a carer'	Patient/client must have a Main Carer's Relationship to the Patient when Carer Availability is 1 and Episode Program/Stream is Palliative Care	Check that the value of the corresponding data elements are correct, and resubmit the record.
E255	Episode has an End Date but does not have a Reason for Ending Episode	Each Episode must have a Reason For Ending Episode where there is an Episode End Date and the Episode Program/Stream is Palliative Care.	Check that the value of the corresponding data elements are correct, and resubmit the record.
E256	Episode Start Date <date> is before Date Referral Received (<date>)	Episode Start Date <date> must be after Date Referral Received (<date>).	Check that the value of the corresponding data elements are correct, and resubmit the record.

Contact/Client Service Event Integrity Rules

Action: Batch Fail

Validation ID	Message	Cause	Resolution
E301	A create Contact/Client Service Event message was sent for a Contact/Client Service Event that already exists in the system (<OrganisationIdentifier>), <CCSEIdentifier>	An ADT_A03 HL7 message was sent to open a Contact/Client Service Event. A Contact/Client Service Event with the same identifier has previously been registered with VINAH.	<p>1) If you are unsure why this error is occurring, confirm you are extracting the correct period of data, and if the previous submission was accepted.</p> <p>2) Contact the HDSS Helpdesk or your software vendor for support.</p>
E302	Contact/Client Service Event update/delete message was sent, but the episode being referred to has not been previously registered (<OrganisationIdentifier>, <CCSEIdentifier>)	An ADT_A08/A13 HL7 message was sent to update/delete a Contact/Client Service Event, but the Contact/Client Service Event has not previously been registered with VINAH.	<p>1) If you are unsure why this error is occurring, confirm you are extracting the correct period of data, and if the previous submission was accepted.</p> <p>2) Contact the HDSS Helpdesk or your software vendor for support.</p>
E303	Contact/Client Service Event message contains a person identifier that has not yet been registered (<OrganisationIdentifier>), <PersonIdentifier>	An ADT_A03/A08 HL7 message was sent to open an episode. The patient/client that is referred to on the episode has not previously been registered with VINAH. An ADT_A04 message should first register the patient/client in order for the Contact/Client Service Event to relate to that patient/client.	<p>1) The registration message for the related patient/client has generated an error, and was not accepted. This message refers to that patient/client, which due to the rejection, is not yet in the database. In this case, it is likely this message can be resent without change once the patient/client registration has been corrected.</p> <p>2) The patient/client registration did not generate an error, but was contained within a batch of messages that were not accepted due to a batch rejection.</p> <p>3) If you are unsure why this error is occurring, confirm you are extracting the correct period of data, and that the previous submission was accepted.</p> <p>4) Contact the HDSS Helpdesk or your software vendor for support.</p>

Validation ID	Message	Cause	Resolution
E304	Contact/Client Service Event message contains an episode identifier that has not yet been registered (<OrganisationIdentifier>), <EpisodeIdentifier>	An ADT_A03/A08 HL7 message was sent to open an episode. The patient/client that is referred to on the episode has not previously been registered with VINAH. A PPP_PCB message should first open the episode in order for the Contact/Client Service Event to relate to that episode.	<p>1) The message to create the related episode has generated an error, and was not accepted. This message is linked to that episode, which due to the rejection, is not yet in the database. In this case, it is likely this message can be resent without change once the episode message has been corrected.</p> <p>2) The create episode did not generate an error, but was contained within a batch of messages that were not accepted due to a batch rejection.</p> <p>3) If you are unsure why this error is occurring, confirm you are extracting the correct period of data, and that the previous submission was accepted.</p> <p>4) Contact the HDSS Helpdesk or your software vendor for support.</p>

Contact/Client Service Event Validation Rules

Action: Batch Fail

Validation ID	Message	Cause	Resolution
E351	Contact/Client Service Event is being transmitted but the related patient/client has incomplete demographic data (<OrganisationIdentifier>), <PatientIdentifier>	Patient/client Demographic information was reported incomplete at an earlier stage, but at the date of the Contact/Client Service Event should be known and entered.	Complete Patient/client demographic information and issue a Patient/client Registration update message, and then resend this Contact/Client Service Event message.
E352	Contact/Client Service Event Date is before the Start Date of the related Episode (<OrganisationIdentifier>), <EpisodeIdentifier>	Contact/Client Service Event Date must be after the Episode Start Date.	Check that the value of the corresponding data elements are correct, and resubmit the record
E353	Contact/Client Service Event Date is after the End Date of the related Episode (<OrganisationIdentifier>), <EpisodeIdentifier>	Contact/Client Service Event Date must be before the Episode End Date.	Check that the value of the corresponding data elements are correct, and resubmit the record
E354	Carer Residency Status <val> has a value but Carer Availability <val> is not set to '1 – Has a Carer'	Carer Residency Status must only have a value where Carer Availability is set to '1 – Has a Carer'.	Check that the value of the corresponding data elements are correct, and resubmit the record
E355	Carer Residency Status <val> has no value but Carer Availability <val> is set to '1 – Has a Carer'	Carer Residency Status must have a value where Carer Availability is set to '1 – Has a Carer'.	Check that the value of the corresponding data elements are correct, and resubmit the record
E356	Contact/Client Service Event is of a compensable type (<AccountClass>) but there is no identifier provided relevant to this compensable agency	Where an Account Class of VX (DVA), TA (TAC) or WC (VWA) is specified, a relevant and correct identifier for that organisation (eg DVA file number) must be provided.	Check that the value of the corresponding data elements are correct, and resubmit the record
E357	A Patient/Client's Legal Family Name and Given Names is provided but Account Class is not VX (DVA) or TA (TAC) or WC (VWA)	A Patient/Client's Legal Family Name and Given names should only be supplied where the Compensable Funding Source is VX (DVA), TA (TAC) or WC (VWA)	Check that the value of the corresponding data elements are correct, and resubmit the record

Validation ID	Message	Cause	Resolution
E358	Account Class is not VX (DVA) or TA (TAC) or WC (VWA), but the Patient's Legal Name or Given Names are not provided	A Patient/Client's Legal Family Name must be supplied where the Account Class is VX (DVA) or TA (TAC) or WC (VWA)	Check that the value of the corresponding data elements are correct, and resubmit the record
E359	Preferred Language is English and an Interpreter is required	Preferred Language cannot be English if an Interpreter is required	Check that the value of the corresponding data elements are correct, and resubmit the record
E360	Preferred Language is English but Interpreter Required (<val>) is not '1 – Interpreter Not Needed'	Interpreter Required must be '1 – Interpreter not needed' if Preferred Language is English	Check that the value of the corresponding data elements are correct, and resubmit the record
E361	Contact/Client Service Event Date is after Date of Death, but Client Present Status (<val>) is not '20 - Carer(s)/Relative(s) of the patient/client only' or '31 - Patient/Client/Carer(s)/Relative(s) not present: Indirect Contact'	Client Present Status must be 20 or 31 where Contact/Client Service Event Date is after Date of Death for the Palliative Care Program/Stream	Check that the value of the corresponding data elements are correct, and resubmit the record
E362	First Contact/Client Service Event is being reported, but Phase of Care at First Assessment and Malignancy Flag are not provided	First Contact/Client Service Event for an Episode must have a value for Phase of Care at First Assessment and Malignancy Flag for the Palliative Care Program/Stream	Check that the value of the corresponding data elements are correct, and resubmit the record

Referral In Integrity Rules

Action: Batch Fail

Validation ID	Message	Cause	Resolution
E401	Create referral message was sent for a referral that already exists in the system (<OrganisationIdentifier>), <ReferralIdentifier>	A RRI_I12 HL7 message was sent to open a referral. A referral with the same identifier has previously been registered with VINAH.	1) If you are unsure why this error is occurring, confirm you are extracting the correct period of data, and if the previous submission was accepted. 2) Contact the HDSS Helpdesk or your software vendor for support.
E402	Referral update/delete message was sent, but the referral being referred to has not been previously registered (<OrganisationIdentifier>, <ReferralIdentifier>)	A RRI_I13 or RRI_I14 HL7 message was sent to update/delete a referral, but the referral has not previously been registered with VINAH	1) If you are unsure why this error is occurring, confirm you are extracting the correct period of data, and if the previous submission was accepted. 2) Contact the HDSS Helpdesk or your software vendor for support.

Referral In Validation Rules

Action: Batch Fail

Validation ID	Message	Cause	Resolution
E410	Date of Referral Receipt Acknowledgment (<date>) is before Date Referral Received (<date>).	Date of Referral Receipt Acknowledgment must be on or after Date Referral Received.	Check that the value of the corresponding data elements are correct, and resubmit the record.

Referral Out Integrity Rules

Action: Batch Fail

Validation ID	Message	Cause	Resolution
E501	Create referral message was sent for a referral that already exists in the system (<OrganisationIdentifier>), <ReferralIdentifier>	A REF_I12 HL7 message was sent to create a referral. A referral with the same identifier has previously been registered with VINAH.	<p>1) If you are unsure why this error is occurring, confirm you are extracting the correct period of data, and if the previous submission was accepted.</p> <p>2) Contact the HDSS Helpdesk or your software vendor for support.</p>
E502	Referral update/delete message was sent, but the referral being referred to has not been previously registered (<OrganisationIdentifier>, <ReferralIdentifier>)	A REF_I13 or REF_I14 HL7 message was sent to update/delete a referral, but the referral has not previously been registered with VINAH	<p>1) If you are unsure why this error is occurring, confirm you are extracting the correct period of data, and if the previous submission was accepted.</p> <p>2) Contact the HDSS Helpdesk or your software vendor for support.</p>
E503	Referral message contains an episode identifier that has not yet been registered (<OrganisationIdentifier>), <EpisodeIdentifier>	A REF_I12 HL7 message was sent to create a referral out. The episode that is referred to on the referral has not previously been registered with VINAH. A PPP_PCB message should first register the episode in order for the referral to relate to that episode.	<p>1) The registration message for the related episode has generated an error, and was not accepted. This message refers to that episode, which due to the rejection, is not yet in the database. In this case, it is likely this message can be resent without change once the episode registration has been corrected.</p> <p>2) The episode registration did not generate an error, but was contained within a batch of messages that were not accepted due to a batch rejection.</p> <p>3) If you are unsure why this error is occurring, confirm you are extracting the correct period of data, and that the previous submission was accepted.</p> <p>4) Contact the HDSS Helpdesk or your software vendor for support.</p>

Referral Out Validation Rules

Action: Batch Fail

Validation ID	Message	Cause	Resolution
---------------	---------	-------	------------

No specific validations at this time.
