COMMISSIONER'S REPORT

The number of complaints lodged in the last quarter of 2007 decreased by approximately 14% by comparison with the previous quarter last year. There was also a drop in the number of complaints received under the *Health Records Act*. We have no idea why this is the case.

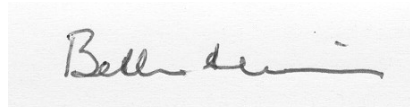

Complainants identified treatment issues as the predominant cause of complaint being 64% of all issues raised by them. Under the *Health Records Act* the most common reason for complaint is refusal of a service provider to give access to medical records. Most of these complaints can be resolved fairly quickly by explaining the law to the provider. Hospitals and doctors, not surprisingly, are the type of service most frequently complained about. Conciliation data this quarter shows an unusually high number of settlements involving compensation and/or refunds or waivers of fees.

The Registrar has been kept busy with a total of 248 complaints being discussed with the registration boards. These were predominantly about medical indemnity practitioners with psychologists and pharmacists the next most frequently complained about, and only 18 complaints pertaining to the remaining eight boards. The HSC received 68 medical practitioner complaints, seven of which were referred to the Medical Practitioners Board of Victoria following discussion. The Board also referred three notifications to the HSC.

Outreach work carried out by the Aboriginal Liaison Officer appears on page 14 of the report as does a brief section on health information privacy training.

In the quarter under review, work was done on a formal investigation into the use of lasers and intense pulsed light source equipment. The HSC has real concerns about the non-regulation in this area with people often having very little training using machines that are potentially dangerous. Complaints have involved burning, scarring, striping of the skin and de-pigmentation. These injuries can be permanent and can be very difficult to repair. The HSC will be presenting a de-identified copy of the final investigation report to the Minister for Health in February 2008. During this quarter HSC also completed an investigation of a counsellor who formed a sexual relationship with a client who subsequently committed suicide. The investigation revealed that the provider had very little idea of the ethics relevant to counsellors and made recommendations about training. The complainant, who was the ex-wife of the patient, later wrote a very warm letter to the HSC thanking us for dealing with her case with such compassion.

Plans are underway to celebrate the 20th anniversary of the HSC with a reception at the Sir Redmond Barry Room on 6 March 2008. The Commissioner is grateful to her staff and to the members of the Health Services Review Council who have assisted with the planning.

Health Services Commissioner

ANALYSIS OF COMPLAINTS TRENDS

	90%	10%		

The largest group of complaints declined in assessment were due to insufficient detail being provided. When this happens, HSC telephones or writes to the complainant seeking further information but occasionally this is not provided.

Conciliation

This Quarter there was an unusually high number of settlements involving compensation and/or refunds or waivers of fees, along with an unusually low number of 'service obtained' outcomes.

Registrar

During the three month period a total of 248 complaints were discussed between the HSC and the Registration Boards. Of this 194 were about medical and dental practitioners, 157 and 37 respectively. There were 19 complaints about psychologists and 17 concerning pharmacists, leaving 18 complaints pertaining to the eight remaining Boards. Of the 68 medical practitioner complaints received by the HSC 7 were formally referred to the Medical Board following discussion. And the Medical Board formally referred 3 notifications for attention by the HSC, of the 89 Board notifications discussed. As the chart below outlines, the total number of notifications formally referred to the HSC by the Boards was 4 in comparison with 13 referred out by the HSC, for attention by the Boards. Two Freedom of Information requests were processed during the period.

Figure 5: Issues in Psychiatric Complaints

There were 7 complaints about psychiatric services this quarter and they were all against Psychiatric Health services.

Koories, Know Your Rights

This quarter involved numerous Outreach activities for the Aboriginal Liaison Officer, resulting in a number of enquiries and some complaints.

Festivals

The ALO attended and participated in Crocfest in Shepparton in October as part of the Koories Know Your Rights initiative with a number of other agencies. Crocfest is an annual event for indigenous students across the country with a focus on promoting health, education and self-development amongst students. There were over 2400 students in attendance.

Information on the OHSC's services was distributed and enquiries also taken at the following events:

- VAYSAR Football & Netball Carnival – Shepparton (October)
- Various indigenous agencies liaised and consulted with for outreach activities in the Albury-Wodonga region, including Albury Wodonga Aboriginal Health Service and Mungabareena Aboriginal Corporation (November).
- 2007 Yan Yean Gathering - Thornbury (December)
- ATSI Family Day, Kangan Batman TAFE, Broadmeadows (December)

Health Information Privacy Training

A health information privacy session was conducted for all staff at the Victorian Aboriginal Health Service (VAHS) in December. Information was provided on storage and access to health records, use and disclosure, health privacy policies amongst other privacy issues in Aboriginal communities. All staff were given a copy of the OHSC publication "Health Privacy – It's Our Business. A Guide for people working with Aboriginal and Torres Strait Islander Communities in Victoria". Further targeted training will be provided to VAHS staff in the New Year.

Conferences

HOSPITAL HEALTH COMPLAINTS DATA

During this quarter 21 hospitals/community centres provided complaints data, which showed they received 776 complaints. The major area of concern to people was access making up 29% (234), treatment 26% (209) and communication 27% (199).

EXECUTIVE SERVICES

The Executive Services Unit comprises two staffing streams and provides corporate support services for the office including Finance, Human Resources, Information Technology, Purchasing, Vehicle Management, Building Services and Reception Services. It is also responsible for the operation of the *Health Records Act 2001*(Vic) (HRA) and the provision of legal advice to the Commissioner and staff.

Health Records Act 2001

The office continues to offer training, education and support to holders of health information and consumers on their respective responsibilities and rights under the legislation. These organisations include health services providers, government departments and agencies, local government, employers and many other holders of health information. Holding joint training sessions with Privacy Victoria and also a 'train the trainer' session held at the OHSC office provided education. Ten presentations were provided in the October - December quarter.
