Keep Kids SAFE near water

You can keep children safe from drowning by ensuring your home is ‘Water Safe’ and through constant supervision.

IN OUR HOUSE

☐ I always stay with my child at bath time
☐ I have a non-slip mat in the bath or shower to stop slipping
☐ I keep the toilet lid down
☐ I keep the plug for the bath or shower out of reach of children
☐ I make sure large water containers, such as nappy buckets, are out of reach of children

OUTSIDE THE HOUSE

☐ I have my home swimming/spa pool fenced in accordance with the Fencing of Swimming Pools Act 1987
☐ I check for water hazards around my home (i.e. drainage on my section after rain, paddling pool emptied after use)
☐ I am aware of other water hazards in my neighbourhood (e.g. neighbour’s pools, rivers, streams and drains)
☐ I have a safe fenced play area for my child

Always supervise children near water – ALWAYS!
