Haccpac	HACCPAC offers a complete information system that satisfies both the 'client' and 'service provider' aspects of HACC service provision. HACCPAC is an easy to use, cost effective and flexible system, allowing HACC service providers to manage their HACC services with considerable savings, particularly in the areas of rostering and accountability. HACCPAC can be used as a simple recording and rostering system as well as a collator of information for reporting and planning. It is compatible with present and anticipated requirements for monitoring HACC services, e.g. SCTT 2009 and MDS Version 2.0.	Vada Computing Pty Ltd Mark Eckermann PO Box 242 Blackburn South VIC 3130 tel: 03 9890 5418 email: mark.eckermann@vadacomputing.com.au web: www.vadacomputing.com.au	Yes		100 Can be exported as MS Word: Yes Can be exported as RTF: Yes Can be exported as PDF: No Can be exported as HTML: No Can be exported as XML: No Can be saved locally: Yes Can be printed: Yes Can be shared via secure e-referral / distributor system / messaging system: Yes	Can be exported as HL7: No, though possible within 6 months
