2008/3.1.1 corrections

Alignment with CCDS v2.1

No changes to the “human readable” view

Fundamentally codeset changes

Implementation products

Data model and data dictionary

Functional specification

HL7 messaging implementers specification and messaging standard

2009 revision

Changes to the “human readable” view and further codeset changes

Likely the addition of a Care Coordination Plan, a tool to better support those working with families/groups/household, and specific tools to better support GP referral

Alignment with CCDS v3.0

Key messages

The 2008/v3.1.1 release is very much a correction

Alignment with harmonized corporate data (i.e. CCDS)

Standard implementation products delivered in a timely manner
