Victorian Immunisation schedule November 2025

This schedule is intended as a guide only. For complete and authoritative information, a full consultation with the Australian Immunisation Handbook (AIH) is recommended.

National Immunisation Program schedule - Infants and children

Age	Disease	Vaccine	Notes	
Birth	Hepatitis B	H-B-Vax-II paediatric or Engerix-B paediatric (IM)	Within 7 days of birth (ideally within 24 hours), no catch-up required	
2 months (from 6 weeks)	Diphtheria-tetanus-pertussis, poliomyelitis-hepatitis B- <i>Haemophilus influenzae</i> type b	Infanrix <i>hexa</i> (IM) or Vaxelis (IM)	Rotarix: Dose 1 limited to 6-14 weeks of age,	
4 months	Pneumococcal	Prevenar 20 (IM)	dose 2 limited to 10-24 weeks of age – Minimum intervals apply – see AIH# Bexsero: Prophylactic paracetamol	
	Rotavirus	Rotarix (Oral)		
Aboriginal [‡]	Meningococcal B	Bexsero (IM)	recommended—see AIH [#] . Catch up available for Aboriginal [‡] children <2 years	
6 months	Diphtheria-tetanus-pertussis- poliomyelitis-hepatitis B- <i>Haemophilus influenzae</i> type b	Infanrix <i>hexa</i> (IM) or Vaxelis (IM)	Minimum intervals apply – see AIH# Additional funded dose of Prevenar 20 for all Aboriginal and Torres Strait Islander infants, medically at-risk infants for IPD* – see AIH#	
Aboriginal [‡]	Pneumococcal	Prevenar 20 (IM)		
6 months to <5 years (annually)	Influenza†	As supplied	Administer annually. For children aged 6 months to < 9 years receiving the vaccine for the first time, give 2 doses at least 1 month apart	
12 months	Measles-mumps-rubella	Priorix or M-M-R II (IM/SC)	Bexsero: Prophylactic paracetamol recommended—see AIH#. Catch up available for Aboriginal [‡] children <2 years	
	Meningococcal ACWY	Nimenrix (IM)		
	Pneumococcal	Prevenar 20 (IM)		
Aboriginal [‡]	Meningococcal B	Bexsero (IM)	_	
18 months	Measles-mumps-rubella- varicella	Priorix-tetra (IM/SC)		
	Diphtheria-tetanus-pertussis	Infanrix or Tripacel (IM)	_	
	Haemophilus influenzae type b	Act-HIB (IM/SC)		
4 years	Diphtheria-tetanus- pertussis- poliomyelitis	Infanrix IPV or Quadracel (IM)		
≥ 5 years with atrisk condition (annually)	Influenza†	As supplied	Administer annually. For children aged 6 months to under 9 years receiving the influenza vaccine for the first time, give 2 doses at least 1 month apart	
Aboriginal [‡] ≥ 5 years (annually)				

National Immunisation Program schedule - Adolescents, adults & at-risk

Age	Disease	Vaccine	Notes	
Aboriginal [‡] (annually)	Influenza†	As supplied	Administer annually	
People with at risk conditions (annually)	Influenza†	As supplied	Administer annually	
Year 7 (or age equivalent)	Human papillomavirus (HPV)	Gardasil 9 (IM)	HPV: Single dose recommended. Not required if previously received. Catch-up for dose missed available up to 20 years (HPV up to 26 years)	
	Diphtheria-tetanus- pertussis	Adacel or Boostrix (IM)		
Year 10 (or age equivalent)	Meningococcal ACWY	MenQuadfi (IM)	Catch-up for dose missed available up to 20 years	
People with new diagnosis risk conditions for IPD*	Pneumococcal	Prevenar 20	See AIH# for conditions Single dose Prevenar 20 at	
12 months to <18 years			diagnosis	
People with new diagnosis risk conditions for IPD* 18 years and older	Pneumococcal	Prevenar 13 then Pneumovax 23 (IM)	See AIH# for risk conditions, vaccine doses and timing	
All people with asplenia, hyposplenia,	Meningococcal ACWY	Nimenrix (IM)	See AIH# for required doses and timing	
complement deficiency and treatment with eculizumab	Meningococcal B	Bexsero (IM)		
>5 years with asplenia or hyposplenia	Haemophilus influenzae type b (HiB)	Act-HIB (IM)	If incompletely vaccinated or not vaccinated in childhood	
People ≥18 years at increased risk of herpes zoster due to underlying conditions or immunosuppressive treatments	Shingles (Herpes Zoster)	Shingrix (IM)	See AIH# for required doses, timing and NIP funding for risk groups recommended for vaccine	
People < 20 years of age Refugees, humanitarian entrants of any age	Age-appropriate NIP vaccine catch-up	As supplied	See AIH# for age-appropriate schedules	
Pregnant people	Influenza†	As supplied	Influenza†: Any trimester	
	Pertussis (whooping cough)	Adacel or Boostrix (IM)	Pertussis: Each pregnancy between 20-32 weeks gestation	
	Respiratory Syncytial Virus (RSV)	Abrysvo (IM)	RSV: 28-36 weeks gestation	
Aboriginal [‡] ≥50 years	Pneumococcal	Prevenar 13 then	See AIH# for required doses and timing	
		Pneumovax 23 (IM)		
	Shingles (Herpes Zoster)	Shingrix (IM)		
People ≥ 65 years	Influenza†	As supplied	Administer annually	
People ≥ 65 years	Shingles (Herpes Zoster)	Shingrix (IM)	See AIH# for required doses and timing	
From 70 years	Pneumococcal	Prevenar 13 (IM)		

- The National Immunisation Programme (NIP) provides free vaccines to infants, children, adolescents, and adults eligible for Medicare
- Individuals < 20 years can receive catch-up NIP vaccines missed in childhood, except HPV, which is free up to age 25.
- Refugees and humanitarian entrants of any age are eligible for catch-up vaccines for: diphtheria—tetanus—pertussis, varicella, poliomyelitis, measles—mumps—rubella, hepatitis B, and HPV (up to age 25).
- The number and type of catch-up doses vary by age. Refer to the Australian Immunisation Handbook for details.

Victorian Government funded immunisation programs

This information is provided as a general guide only. Vaccine funding and eligibility criteria are determined by the Victorian Government and may change over time. For the most current and detailed information, refer to the **Victorian Immunisation Schedule** and the **Australian Immunisation Handbook (AIH)**.

Disease	Vaccine	Age/at risk conditions
Tuberculosis (BCG)	As supplied (ID)	BCG for infants & children under 5 years of age travelling to TB endemic countries. See AIH# for dosing and vaccination procedures
Measles-mumps- rubella	As supplied (IM/SC)	 Infants from 6 months and before 11 months of age prior to overseas travel. This dose is in addition to the scheduled MMR vaccine doses recommended at ages 12 (MMR) and 18 months (MMRV) People born during or since 1966 without documented evidence of 2 valid doses or serological immunity
Age-appropriate NIP vaccine catch-up	As supplied	 Vulnerable citizens – a person who has experienced socioeconomic disadvantage that compromised their equitable access to the vaccine during their period of eligibility. See AIH# for required doses and schedule
Hepatitis B	As supplied (paediatric or adult) (IM)	Eligible people at risk – Refer to the Victorian Immunisation schedule and vaccine eligibility criteria online
Japanese encephalitis	As supplied	Eligible people at risk – refer to Department of Health Japanese encephalitis and vaccine eligibility criteria online
Мрох	JYNNEOS	Eligible people at risk – refer to Department of Health Mpox and vaccine eligibility criteria online
Rabies	As supplied	 Australian volunteer wildlife handlers working in a volunteer service in Victoria for the initial course of pre-exposure rabies vaccine Post exposure treatment for rabies or Australian Bat Lyssavirus See AIH# for required doses and schedule
Respiratory Syncytial Virus (RSV)	Immunisation product - Monoclonal antibody Beyfortus™ (nirsevimab) (IM)	 Available during Victoria's RSV season - April to September Refer to Department of Health RSV immunisation and the AIH# RSV chapter – newborn, infants, and children with risk conditions for RSV disease

^{*}IPD: Invasive pneumococcal disease. #AIH: Online Australian Immunisation Handbook. †Influenza: For information on age-appropriate vaccines or specified medical risk conditions refer to the AIH# or the annual ATAGI advice on seasonal Influenza vaccines. ‡Aboriginal: The term Aboriginal is inclusive of Aboriginal and Torres Strait Island people.
